				CHEM 5310		
				CHEM 5330		
				CHEM 5350		
				CHEM 5370		
**Deficiencies	Term	Grade		**Deficiencies	Term	Grade

\*Substitutions are made only upon Graduate Advisor approval and only under special circumstances.

\*\*Deficiency courses do not provide credit towards the MS degree.

\*\*\*CHEM 5390 is taken only once, CHEM 5391 is taken at least once and must be taken the term of graduation. Both courses are assigned No Grade (NG) until your thesis is defended, at which time a grade is assigned that replaces all of the NG notations. International students on an F-1 visa need to register for one section of the appropriate course if their classroom hours are less than 9 for a given semester. This maintains an international student's full time status.

\*\*\*\*Elective courses must be approved by the Graduate Advisor. Minor field courses are normally approved for Biology, Chemical Engineering, Education, and Computer Science.
